

Sunsation has earned its orbit as one of the shining stars in the limited-production powerboating uni-

platforms. As it has become more popular in the West, the cry found its way back to Michigan: bring on a mid-cabin

If there is a better-looking bolster seat in sport boating today, we haven't seen it: This **McLeod creation**, with its sweeping, stylish elliptical cut-away sides and integrated hand grips, is **light years ahead of its competition** in every critical area of interior dynamics. It is absolutely comfortable, zealously padded, exquisitely finished, rich to the touch and **Smithsonian-level in design**. Even better, it looks like it was designed specifically for the **Sunsation cockpit**.

The 32-foot version integrates a spacious and fabulously executed cabin area; forward bow seating that we found truly comfortable during our 150-mile occupation and a driver-friendly bottom that continues to astound us with its superb acceleration and polished handling manners. This boat has a great open-water presence, it mows down rough surface chop with
